Educational Requirements - Fort Franklin

Attached is a copy of a memorandum from the Chief of the Division regarding the provision of a Home Economics room in the proposed addition to the Fort Franklin school. You will note that costs apparently make such an addition impossible at the present time, but that it is planned to include this in a later addition. It may be that you could take some steps to make the second floor facilities in the school available for this on the basis of a local construction project as suggested in Mr. Simpson's memorandum.

This matter is left for your consideration and action if deemed feasible and if funds are available.

B.C. Gillie/fg
