The Indian Agent,
Alert Bay, B. C.

Dear Sir,

This is to advise the receipt and installation of Hot water heater, vertical boiler type, from the Patterson Boiler Works, Vancouver. This boiler looks as if it will give very satisfactory service.

For purposes of our departmental inventory, we are valuing this boiler at \$328.00.

Thanking you for your help in securing this much needed piece of equipment,

Yours very truly,

W. H. R. [Signature]

FEA/L.

December 19, 1938.

Dear Sir:

Re File 156-0-5.

I have received your letter of December 8th, together with copy of Dr. Westgate's letter regarding the lighting system at St. Michael's Indian Residential School, at Alert Bay.

On October 29th Mr. Indian Agent Todd wrote to this office in connection with the matter and forwarded at that time a letter he had received from Mr. Anfield, Principal of the school, in which certain suggestions for a change in the lighting system were set out but no definite recommendation made. This matter was dealt with during my absence from the office by Lieut. Colonel Pragnell, a copy of whose reply to Mr. Todd is attached hereto along with the letters referred to from Mr. Anfield and Mr. Todd, for your information. This subject was further discussed with the Agent a few days ago, and he stated he had no objection to the change being made, providing all costs involved in the switch over were met out of school funds and also that sufficient of the present equipment be retained to provide light and power, should the company fail to meet its obligations.

The Pacific Power & Water Company Ltd. are prepared to install the necessary equipment required to supply light and power to the main school and adjacent buildings and accept in payment therefor the 7 H.P. Petters engine, installed a little over a year ago by the Department at a cost of over \$500.00 and now valued under the proposed change at \$216.00, and also the 6 H.P. Lister gas engine and generator, which is the smaller of the two lighting plants in use at present, at a valuation of \$150.00. The school would retain the larger of the two lighting plants for use as an auxiliary unit in an emergency, should occasion arise. To be of use in this connection I should imagine that new batteries would still be required and if we are called upon to supply these I cannot see where the argument that the switch over should be made in order to avoid this expense to the Department, can be maintained.

The Secretary,
Indian Affairs Branch,
Department of Mines and Resources,
Ottawa, Ont.

Under ...

Indian Affairs. (RG 10, Volume 6428, file 875-5, part 6)

PUBLIC ARCHIVES

ARCHIVES PUBLIQUES

POOR-COPY

Under the proposals, there would be a sacrifice of our machinery at the prices quoted, particularly on the Petters engine, but I doubt if this constitutes a sufficient reason to object to the change being made. There would be no equipment surplus to requirements.

The new equipment required to effect the change is set out in Mr. Anfield's letter of October 19th attached hereto, and need not be repeated here. No information with respect to the rates the company proposes to charge for the electricity has been supplied to this office, and it is presumed that whatever these costs may be, the school is prepared to meet them from their own funds. Under these circumstances, there should be no objection to the changes being made provided also the Department is not called upon to meet the cash costs involved in switching from the present system to the Pacific Power & Water Company Ltd. I should like to suggest that in the event of the proposal being approved, that the Department obtain certain assurances from the school Commission that the machinery being removed as a result of the change or its equivalent will be replaced by the Commission should it be found necessary to return to the provision of light and power to the school by the system now in operation.

Yours faithfully,

Encl

Indian Commissioner's Office,
Vancouver, B.C., November 4, 1938.

Dear Mr. Todd:

I am in receipt of yours of the 29th ultimo with reference to a proposed change from supplying their own electric light to connecting up with the Pacific Power and Water Company, of the St. Michael's Residential School. I note your remarks in the matter and that you feel you cannot recommend this, and I am inclined to agree with you. I notice, too, that the Principal himself actually makes no recommendation. He is merely informing us that this Company has made an offer.

I agree with you that it would be sacrificing our machinery at the price suggested and, further, we are not at all yet sure as to whether there would be any saving in expense to either the school or the Department. I notice that Mr. Anfield gives no figures to that effect.

Yours faithfully,

G. S. Pragnell
For D. M. MacKay.

FILE _____

Alert Bay, B.C.,
October 29, 1938.

Dear Sir,-

The Enclosed correspondence has been received from Principal Anfield of St. Michael's Indian Residential School Alert Bay, and will be self-explanatory.

It is noted the Principal is considering recommending to the Commission they use electric light and power from the Pacific Power & Water Company Ltd., Alert Bay, and discontinue the use of their own electric light plant in the school provided by the Department. Mr. Anfield sets forth a list of equipment required to make the switchover, and at the same time suggests the Department turn in the 7 H.P. Petters engine now used for pumping at the school well, and also the 6 H.P. Lister gas engine and generator which is a smaller unit of the present electric light plant, to the above Company, which would mean the switchover could be done without any cost to the school.

In looking up the engineer's recent report, I find he reports the electric light plant in good order with the exception that the batteries are poor. In looking back further I find last year the engineer stated the batteries should be overhauled by the resident engineer in charge, and this was reported to the Principal of the school at that time. I do not believe any effort was made by the school to have these batteries overhauled as recommended by Mr. Arnall, and this no doubt is the reason why the batteries have deteriorated so quickly.

I cannot recommend to the Department that we assume any obligation or cost in the matter of a switchover from the present lighting system in order that the school may use electrical energy from the Pacific Power & Water Company for the following reasons.

The 7 H.P. Petters engine which Mr. Anfield values at \$216.00, was purchased new last year and cost over \$500.00. This engine is in excellent shape and should be worth more than the value quoted by Mr. Anfield. I also feel that it should be kept intact as an auxiliary plant in case of emergency.

I am also opposed to our present electric light system being dismantled even though this small unit is getting old, as I am not satisfied that the present Company can guarantee to supply the school with continuous electrical energy. It is only a new Company starting up, and should anything happen to them it might mean the Department would be called upon to install a new electric light system at the school were we to permit the present plant to be dismantled.

I feel if the School wishes to switch over and take "city power" they should do this at their own expense and that the present equipment should be kept intact at least for the present, until such times as we are satisfied the Company can give continuous service.

Your obedient servant,

MS Todd

Alert Bay, B.C.,
January 28, 1939.

Sir,-

Your letter No.156-0-5 dated January 17th last in respect to the old tubular boiler now in storage at the Alert Bay Residential School has been received, and in reply I beg to advise you this boiler was some two years ago replaced by a larger one and has been in storage at the School ever since.

At that time the Salvage Officer requested me to try and obtain a sale for the boiler, but I was unable to do so. Later I wrote to the Department on May 17th last suggesting it be transferred to the Kwawkwalth Agency and left in my care to be used for any useful purpose I might decide; I had in mind at that time possibly I could utilize it in some Indian village for a bath house. However it was later found impossible to use it for that purpose.

On December 20th last Mr. Sharpe of Alert Bay, who owns a boat building establishment, told me he might be able to use it in his plant and offered me Twenty Dollars for it. After giving his offer due consideration I felt it was best to do something with it rather than leave it at the school to possibly rust out, and wired the Salvage Officer at Ottawa stating we had received this offer of Twenty Dollars and asked for authority to authorize the sale.

On the same date I received a telegram stating he would accept Twenty Dollars for it, and to advise the name of the purchaser.

I notified Mr. Sharpe that the Salvage Officer would accept his offer but to date he has not taken delivery of the boiler nor has he made any payment for it. Shortly after receipt of my letter Mr. Sharpe was injured and has been in the hospital ever since, and I presume that is why he has not been able to take delivery up to now.

Possibly I should have reported the matter to our Department in view of their letter of June 20th advising the old boiler could be used at some Indian village, but I was under the impression when I referred the matter back to the Salvage Officer he would immediately notify our Department at Ottawa and if they had any objection I would be so advised. When I received his telegram authorizing the sale and to accept the Twenty Dollars, I felt that everything was clear in Ottawa so far as past correspondence was concerned.

In view of your letter I shall not make delivery of the boiler until such time as I receive definite word from you. Would you kindly advise me your wishes by return mail so that I will know what to do when Mr. Sharpe comes to see me.

Your obedient servant,

M. S. Todd

21st January, 1939.

The Indian Agent,
Alert Bay, B. C.

Dear Sir,

We would be most grateful for anything you could do to assist us in obtaining two used filing cabinets in which to keep past correspondence and "dead" files.

You will understand that since this school has opened there has been a large volume of correspondence, and at the present time this is being kept in a cupboard which has now become very much congested, and there is no available space for the keeping of further records. We have two filing cabinets for our current files, and these two are very full. We do not require new cabinets, old wooden used cabinets would do very well, and we thought that perhaps there might be some of these to spare from one of the Department's offices through re-organization. We would be willing to pay any freight charges on the cabinets, if the Department would see fit to issue two of these cabinets to us.

If you can help us in any way in this matter it will be greatly appreciated.

Yours sincerely,

L.

Principal.

MEMORANDUM

Dr. McGill,
Indian Affairs.

Re: Disposal of old tubular boiler,
at Alert Bay, Indian Residential
School. Your file 156-0-5.

With reference to your memorandum of the 6th instant, and the offer of Mr. Sharpe of \$20.00 for the old boiler, the Salvage Officer points out that as this was previously advertised for sale by tender and no bids were received, it would seem advisable to authorize the Agent to sell this equipment at the best price obtainable. If, therefore, Mr. Sharpe tenders the sum of \$20.00 the Agent is authorized to release the boiler to him and collect the purchase price, which should be promptly forwarded here, in order that a Salvage Minute may be issued confirming the sale. If the Agent is able to realize a larger amount from some other party, he is at liberty to do so, in order to dispose of the boiler at the earliest possible date.

Would you kindly advise him regarding the above.
